Search Notes

Dear Examiner Beliveau,

Attached are the search results (from commercial databases) for your case.

Tags mark the patent/articles, which might be of interest. After you review all records including tagged and untagged records, if you wish to order the complete text of any record, please submit request(s) directly to the STIC-EIC 2600 Email Box or hand carry the request to the front desk of the respective EIC.

Please call if you have any questions or suggestions. I have enclosed a Search Results Feedback Form to facilitate further comments or suggestions. Please take a few minutes to share with us your feedback.

Thanks

Virgil O. Tyler

ABSTRACT

... including a reception means that receives a television broadcast signal resulting from multiplexing audio data, video data and program information and broadcast from a broadcast station, a program guide generating means that generates one or two kinds of program guide data or more based on the program, a program guide display control means that converts the generated program guide data into a display output enabled signal and displays the signal on a display screen, and an input device that provides an instruction signal for channel selection or the like, the program guide display control means displays the program guide data comprising one or two program information items or more generated by the program guide generating means on part of the display screen in a way of not disturbing view of the program video image.

...SPECIFICATION channel. On the other hand, when the cursor, highlight or focus is moved to a **program** grid, the content of the video window does not change.

BRIEF DESCRIPTION OF THE DRAWINGS

In the drawings:

Fig. 1 shows an example of a television system suitable for processing **program guide** information in accordance with the present invention.

Fig. 2 shows an example of a digital video processing apparatus suitable for processing **program guide** information in accordance with the present invention.

Fig. 3 shows a block diagram of a specific implementation of a digital satellite system suitable for processing **program guide** information in accordance with the present invention.

Fig. 4 shows an example of a **program guide** being displayed.

Figs. 5A- C show exemplary embodiments of the present invention.

Fig. 6 shows an exemplary flow diagram in accordance with the present invention.

DETAILED DESCRIPTION

Fig. 1 shows...to right and then up), the video content of the window stays locked to the **program** currently being **shown** in channel 104 and does not changed. The user in this mode, may channel surf using the **program guide** , without the tuner changing the picture in the window.

Hence, the present invention provides **two** modes of operation for a **program . guide** and a video **window** depending on the position of a highlight or cursor. When the cursor or highlight is...

Detailed Description

Detailed Description

... window.

Generally, the video frame within each window is refreshed at some
periodic rate.

Mosaic **program guides** help viewers to preview and navigate through
the **numerous** 0 programs transmitted by digital television systems.

However, providing mosaic **program** guides is costly and time consuming. One technique for generating a mosaic **program** guide requires simultaneous **video** decoding and presentation of multiple programs in multiple windows. This technique requires very fast and...

...SPECIFICATION services on another portion of the screen. There is also a need for such a **program schedule** system that permits the user to **select** from a **plurality** of **selectable display** formats for viewing the **program schedule** information. It is also preferred to have a system that indicates to the user those...

...one of the plurality of channels. A data processor receives and stores in a memory **television program schedule** information for a **plurality** of **television** programs to appear on the plurality of television channels. A user control apparatus, such as...

...the video display generator with video control commands, issued in response to the user control **commands**, to **display program schedule** information for any chosen one of the **plurality** of **television** programs in overlaying relationship with at least one **television program** then appearing on any chosen one of the plurality of channels on the television receiver...

...system may further comprise a television.

In yet another aspect the invention relates to an **electronic television program guide** for use in connection with a television receiver for displaying a **plurality** of television programs from a **plurality** of **program** sources on a **plurality** of user-selectable **television** channels, comprising: user control means for issuing control commands including channel-control commands; data processing...

...selected by the user in said location menu.

In another aspect the invention provides an **electronic television program guide** for use in connection with a television receiver for displaying a plurality of **program** sources on a plurality of user-selectable television channels, comprising: user control means for issuing control commands including **program schedule** display control commands; storage means for electronically storing television **program schedule** information for a **plurality** of television programs, said **program schedule** information comprising **program** title information, said **program** title information comprising a predetermined abbreviated title for at least one of said plurality of...

...said display further comprising an abbreviated title.

In yet another aspect the invention provides an **electronic television program guide** for use in connection with a television receiver for displaying a **plurality** of **program** sources on a **plurality** of user-selectable television channels, comprising: user control means for issuing control commands including **program schedule** display control commands, said **program schedule** display control commands including background display control commands; storage means for electronically storing television **program schedule** information for a plurality of **television** programs, said storage means being further arranged to store a plurality of user-selectable background...a "Viewer Preference" mode, which allows the user to create or revise a number of **program schedule** system operating parameters. Once **selected**, this display presents the user with **several** preference options concerning certain operating parameters of the **program schedule** system, as well as the viewing of certain channels and/or certain content-specific programming, for example, those **shown** in Fig. 7.

The first option shown in Fig. 7 is the "Parental" option 70...

...CLAIMS A2

1. An **electronic** program schedule system for providing a user with an opportunity to view multiple air times...
...a plurality of air times for at least one program comprises means for providing program **schedule** information including a plurality of air times for at least one pay-per-view **program** ; and
the means for simultaneously displaying the plurality of air times with the **electronic** **program** **schedule** system comprises means for simultaneously displaying the plurality of air times for the at least one pay-per-view **program** with the **electronic** **program** **schedule** system.
3. An **electronic** **program** **schedule** system for providing a user with an opportunity to select a particular air time of a **program** to perform a function associated with the program, comprising:
a video display generator;
a remote...
- ...4. The system defined in Claim 3, wherein:
the program is a pay-per-view **program** ; and
the microcontroller is further **programmed** to order the pay-per-view **program** .
5. An **electronic** **program** **schedule** system for providing a user with an opportunity to view **multiple** air times for a **program** ,
comprising:
a receiver configured to receive **program** **schedule** information including a **plurality** of air times for at least one **program** ;
a video **display** generator;
a remote controller; and
a microcontroller programmed to (1) provide the user with an...
...selected at least one of the multiple air times comprises ordering the pay-per-view **program** .
15. A method for providing a user with an opportunity to view multiple air times...
...information including a plurality of air times for at least one program comprises providing program **schedule** information including a plurality of air times for at least one pay-per-view **program** ; and
simultaneously displaying the plurality of air times with the **electronic** **program** **schedule** system comprises simultaneously displaying the plurality of air times for the at least one pay-per-view **program** with the **electronic** **program** **schedule** system.
17. An **electronic** **program** **schedule** system for providing a user with an opportunity to select a particular air time of a **program** to perform a function associated with the program, comprising:
means for providing the user with...

Improved electronic television program schedule guide system and method
Verbessertes elektronisches Fernsehprogrammführungssystem und Verfahren
Procede et systeme de guide de programmes de television ameliore

PATENT ASSIGNEE:

United Video Properties, Inc., (2770780), 7140 South Lewis Avenue, Tulsa,
OK 74136, (US), (Applicant designated States: all)

INVENTOR:

Alten, Jerry, 10 Wynnesdale Circle, Norberth, PA 19072, (US)

Davis, Bruce , 5505 Preserve, Parkway South, Greenwood Village, CO 80121
, (US)

Morris, Michael , 30 Whistling Swan Lane, Downington, PA 19355, (US)

Youman, Roger, 752 Mancil Road, Wayne, PA 19087, (US)

LEGAL REPRESENTATIVE:

Hale, Peter (60281), Kilburn & Strode 20 Red Lion Street, London WC1R 4PJ
, (GB)

PATENT (CC, No, Kind, Date): EP 1028590 A2 000816 (Basic)
EP 1028590 A3 001025

APPLICATION (CC, No, Date): EP 200915 940520;

DESIGNATED STATES: AT; BE; CH; DE; DK; ES; FR; GB; GR; IE; IT; LI; LU; MC;
NL; PT; SE

...ABSTRACT one of the plurality of channels.

A data processor receives and stores in a memory **television program schedule** information for a **plurality** of **television** programs to appear on the plurality of television channels.

A user control apparatus, such as...

...the video display generator with video control commands, issued in response to the user control **commands**, to **display program schedule** information for any chosen one of the **plurality** of **television** programs in overlaying relationship with at least one **television program** then appearing on any chosen one of the plurality of channels on the television receiver.

...SPECIFICATION services on another portion of the screen. There is also a need for such a **program schedule** system that permits the user to **select** from a **plurality** of **selectable display** formats for viewing the **program schedule** information. It is also preferred to have a system that indicates to the user those...one of the plurality of channels. A data processor receives and stores in a memory **television program schedule** information for a **plurality** of **television** programs to appear on the plurality of television channels. A user control apparatus, such as...

...the video display generator with video control commands, issued in response to the user control **commands**, to **display program schedule** information for any chosen one of the **plurality** of **television** programs in overlaying relationship with at least one **television program** then appearing on any chosen one of the plurality of channels on the television receiver...a "Viewer Preference" mode, which allows the user to create or revise a number of **program schedule** system operating parameters. Once **selected**, this display presents the user with **several** preference options concerning certain operating parameters of the **program schedule** system, as well as the viewing of certain channels and/or certain content-specific programming, for example, those **shown** in Fig. 7.

The first option shown in Fig. 7 is the "Parental" option 70...

...CLAIMS the portion of said guide operates.

32. The system of claim 31, further comprising a **television**

33. An **electronic television program guide** for use in connection with a television receiver for displaying a **plurality** of television programs from a **plurality** of **program** sources on a **plurality** of user-selectable **television** channels, comprising:
user control means for issuing control commands including
channel-control commands;
data processing...

...receiver to the television channel selected by the user in said location menu.

34. An **electronic television program guide** for use in connection with a television receiver for displaying a plurality of **program** sources on a plurality of user-selectable television channels, comprising:

user control means for issuing control commands including **program schedule** display control commands;

storage means for electronically storing television **program schedule** information for a **plurality** of television programs, said **program schedule** information comprising **program** title information, said **program** title information comprising a predetermined abbreviated title for at least one of said plurality of...

...and at least one time period, said display further comprising an abbreviated title.

35. An **electronic television program guide** for use in connection with a television receiver for displaying a **plurality** of **program** sources on a **plurality** of user-selectable television channels, comprising:

user control means for issuing control commands including **program schedule** display control commands, said **program schedule** display control commands including background display control commands;
storage means for electronically storing television **program schedule**

information for a plurality of **television** programs, said storage means being further arranged to store a plurality of user-selectable background...
